

## **Final Project**

You will interview another member of the class for about five minutes. Talk about the topics from this semester. Here are some questions to help you.

*How do you think new media differs from old media?*

*What technical skills did you learn during this semester?*

*Which of the projects did you enjoy the most and why?*

*Is your smartphone a tool for creation, communication or consumption?*

*How long should a good youtube video be? How long should a good tv show be? Why?*

*Who is in charge of the TV remote control in your house? Do you watch any shows as a family?*

*Do you record TV shows to watch later?*

*DVD's offer many different audio and subtitling options. What do you think about that?*

*Is a TED talk educational or entertaining?*

*Why do people feel the need to start their own YouTube channel?*

*Why do news reporters tend to stick to a set pattern or style?*

*Television is becoming less important. What will we use if we lose the communal experience of watching TV together?*

Record the interview on video and share it with me at [darrenrelliott@gmail.com](mailto:darrenrelliott@gmail.com) by the end of class on July 17th. You should also return your feedback sheet with your own comments by the same date.
